

~~CONFIDENTIAL~~

25 February 1981

MEMORANDUM FOR: Chief, Policy and Plans Group

25X1

(3) 5. A package inspection was conducted at the Ames and Key Buildings, between the hours of 1600 and 1800 on 18 February 1981. The results of the inspection were highly favorable, in that no Agency employees were found to be carrying classified information to unauthorized locations. (U)

25X1 6. Work on the [] continues at a rapid pace. Assuming that the good weather holds, the subcontractor responsible for erecting the building frames for the concrete floors and ceiling expects to have fully completed the work by 27 February. The next major phase of construction will be the installation of the wiring and plumbing, which will be followed by the dry wall and finishing contractors. The builder is optimistic that both buildings will be complete by the end of July 1981. (U)

9. On 24 February 1981, two members of ISSG joined representatives of DSB, TSD, and OC/COMSEC at a briefing at NPIC to discuss the communication support needed as a result of renovations and new construction [redacted] The main topic concerned the need for either a new wide-band coaxial data communications bus or maintain the existing data grid system. (U)

[redacted]

(5) 11. The Department of Labor was provided statistical reports for CY-80, covering the occupational injuries and illnesses of Agency employees, fires, and accidents involving motor vehicles, property, and equipment. These reports were submitted in compliance with reporting requirements of the Occupational Safety and Health Act. The total number of injuries/illnesses (which does not include first aid cases) submitted was 284 (132 lost workday and 152 nonfatal). For comparison, there were 304 injuries/illnesses (140 lost workday and 157 nonfatal) during CY-79. (U)
